

PETER GOOD

Senior Frontend Developer

Knoxville, TN | Open to Onsite / Hybrid / Remote | [Email](#) | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Strategic Senior Frontend Engineer with 13+ years of experience architecting and deploying scalable, accessible web applications within the financial sector. Proven track record of modernizing 50+ enterprise banking platforms used by over 500,000 users in highly regulated environments. Expert in **React, TypeScript, and modern frontend architecture**, specializing in WCAG 2.2 AA compliance and enterprise-scale UI systems. Spearheaded R&D initiatives to transition legacy CMS infrastructure toward modern, component-driven frameworks.

CORE TECHNICAL SKILLS

Modern Stack: React, Next.js, TypeScript, JavaScript (ES6+), Angular, Vue 3, Tailwind CSS, Bootstrap

Architecture & UI Systems: Scalable Frontend Architecture, Multi-tenant Applications, Component Design, Legacy System Modernization

Accessibility & Compliance: WCAG 2.2 AA, WAI-ARIA, Accessibility Auditing, Regulatory Financial Standards

Tooling & Workflow: Git, GitHub, CI/CD (GitHub Pages), Performance Optimization, SEO, Google Analytics, AI-Augmented Development, Adobe XD

PROFESSIONAL EXPERIENCE

FIS (Fidelity National Information Services) St. Petersburg, FL

Senior Frontend Developer *February 2012 – March 2026 (13 years)*

- **Architected and launched 50+ responsive banking platforms** nationwide, improving digital experiences for 500,000+ end users in regulated financial environments.
- **Led WCAG 2.2 AA accessibility compliance** across all client deployments, eliminating legal exposure and expanding addressable market reach for financial institutions.
- **Spearheaded internal R&D initiatives** evaluating React, Angular, and Vue 3 as strategic successors to legacy CMS infrastructure, establishing the technical roadmap for platform modernization.
- **Implemented a same-day production resolution workflow** that eliminated a critical legacy support backlog and reduced average downtime across a high-volume portfolio.
- **Partnered cross-functionally** with design, product, and backend teams to deliver polished digital banking experiences balancing regulatory constraints with modern UX standards.

Account Manager / Product Support

November 2006 – January 2012 (5 years)

- Managed technical relationships and escalations for 50+ financial institutions across online and mobile banking platforms.
- Served as the primary technical liaison between clients and internal product teams for high-stakes, regulated applications.

TECHNICAL PROJECTS & CONTINUED DEVELOPMENT

- **Career Tracker App (React & TypeScript):** Built and deployed a production-style CRUD application for job search management, focusing on React state persistence, dynamic filtering, and mobile-first design with Tailwind CSS.
- **Enterprise Job Board (Angular):** Developed a structured recruitment platform using TypeScript-heavy architecture and modular component design.
- **Multi-City Mortgage Calculator (Vue 3):** Applied 13 years of banking domain knowledge to a reactive UI comparing affordability across three cities simultaneously.
- **Development Workflow:** Maintain 10+ public GitHub repositories with structured version control and modern CI/CD-style deployment via GitHub Pages.
